Professional Summary

Babirye is a resourceful and inventive individual with a strong aspiration to apply her technical knowledge and passion for problem-solving to contribute to projects at the forefront of technology. With a solid foundation in the principles of civil engineering, she brings a keen interest and confidence in the design, development, and optimization of projects that prioritize efficiency, sustainability, and user experience.

Skills

Familiarity with AutoCAD, Civil 3D, and structural analysis tools.
Understanding of project phases, scheduling, documentation and budgeting.
Knowledge of load calculations and structural integrity.
Understanding properties and uses of construction material
Ability to interpret topographical data and use surveying equipment.
Awareness of green practices and environmental regulations.
Ability to analyze challenges and develop effective solutions.
Precision in calculations, designs, and regulatory compliance.
Knowledge of safety standards and OSHA regulations.

Work experience

2022 Ministry of Works and Transport - Civil engineering trainee
2023 Hana Express Engineers and Contractors Limited - Civil engineering trainee
